

Competence	Awareness	Working	Practitioner
A1 - Have maintained and extended a sound theoretical approach to enable them to develop their particular role.			
A2 - Are developing technological solutions to unusual or challenging problems, using their knowledge and understanding and/or dealing with complex technical issues or situations with significant levels of risk.			
B. Design, Development and Solving Engineering Problems			
B1 - Take an active role in the identification and definition of project requirements, problems and opportunities			
B2 - Can identify the appropriate investigations and research needed to undertake the design, development and analysis required to complete an engineering task and conduct these activities effectively			
B3 - Can implement engineering tasks and evaluate the effectiveness of engineering solutions			
C. Responsibility, Management and Leadership			
C1 - Plan the work and resources needed to enable effective implementation of a significant engineering task or project			
C2 - Manage (organise, direct and control), programme or schedule, budget and resource elements of a significant engineering task or project			
C3 - Lead teams or technical specialisms and assist others to meet changing technical and managerial needs			
C4 - Bring about continuous quality improvement and promote best practice			
D. Communication and Interpersonal Skills			

D1 - Communicate effectively with others, at all levels, in English			
D2 - Clearly present and discuss proposals, justifications and conclusions			
D3 - Demonstrate personal and social skills and awareness of diversity and inclusion issues.			
E. Personal and Professional Commitment			
E1 - Understand and comply with relevant codes of conduct			
E2 - Understand the safety implications of their role and manage, apply and improve safe systems of work			
E3 - Understand the principles of sustainable development and apply them in their work			
E4 - Carry out and record the Continuing Professional Development (CPD) necessary to maintain and enhance competence in their own area of practice			
E5 - Understand the ethical issues that may arise in their role and carry out their responsibilities in an ethical manner.
